

NAMMA PG – Community Platform Overview

Platform Identity

NammaPG is a PG Community Platform designed to bring PG owners and residents together to solve real-world PG-related issues through transparency, verification, and community strength. It is not a booking or payment platform, but a trust-driven ecosystem.

User Roles

- 1 Admin – Governs the platform, verifies users, moderates issues and reviews.
- 2 PG Owner – Lists PGs, rooms, facilities, and confirms resident checkout.
- 3 Customer (User) – Discovers PGs, verifies stay, raises and supports issues, submits reviews.

Core Tables (Names Only)

- 1 users
- 2 pgs
- 3 rooms
- 4 bookings
- 5 reviews
- 6 facilities
- 7 issues

User Verification

Only verified users can raise issues and submit reviews. Verification is done by uploading geo-tagged photos from the PG over time and is approved by admins. Verification is PG-specific.

Community Issue System

Verified residents can raise issues with proof. Verified users from the community can support issues raised for any PG. Issues with higher community support are prioritized by admins.

Safeguards

- 1 Users are protected from false advertising by evidence-based issue reporting.
- 2 PG owners are protected from fake reviews and anonymous complaints.
- 3 Checkout from a PG must be confirmed by the PG owner.
- 4 Admins act as neutral investigators and final decision-makers.

Development Phases

- 1 Phase 1: Authentication, role-based dashboards, PG owner onboarding, user onboarding.
- 2 Phase 2: Community issue support thresholds, PG trust score algorithms, advanced moderation.
