

PDF-8: Booking Entity & Lifecycle

Purpose

The Booking entity represents the core transaction of the NammaPG platform. It connects users, PGs, and rooms while tracking the full stay lifecycle.

Key Relationships

- User → Booking (Many-to-One)
- PG → Booking (Many-to-One)
- Room → Booking (Many-to-One)

Lifecycle States

REQUESTED → CONFIRMED → CHECKED_IN → COMPLETED

Alternate flows: CANCELLED at any stage before check-in.

Financial Snapshot

Rent, deposit, and maintenance are captured at booking time to ensure historical accuracy.

Why Booking is Critical

- Revenue tracking
- Occupancy management
- User history & analytics
- Payment integration readiness
